

## **R Programming \_Basic\_Task 1**

1. Vector recycling
2. Inner multiplication
3. Outer multiplication
4. Functions
  - a. `sample()`
  - b. `seq()`
  - c. `rep()`
  - d. `round()`
  - e. `factorial()`
  - f. `ls()`
  - g. `mean()`
  - h. `set.seed()`
5. `subset`
6. Write a program to calculate the BMI rate? Get the user input & Result should be in integer.
7. Create a function to calculate the BMI Rating? Result should be in integer?
